Advice and Terms.

To avoid mistakes write the order plainly and on a separate sheet from the letter. The prices named are for the stock at nursery grounds. All articles at the risk of the purchaser after being delivered to the forwarder in good order. Should any mistakes occur in count, the same will be corrected if reported promptly.

Terms, Strictly CASH, Except by Special Arrangement.

BRIEF DIRECTIONS FOR TRANSPLANTING TREES AND PLANTS, AND THEIR SUBSEQUENT CULTURE.

Avoid any unnecessary exposure to trees, plants or vines from the time of leaving the nursery grounds until ready to plant. The sun, wind and frost may prove very damaging. Prepare the ground as for a crop of corn; then dig the holes large enough to admit the roots without crowding and doubling them up. Avoid deep planting which is decidedly injurious to the tree, and when excessive may cause its death. It should be no deeper than it stood before removal from the nursery. It is
well to have a moderate mound of earth heeled up around the trees when planted in the fall. It makes them firmer to withstand the winter and as a protection to the roots. It should be leveled again in the spring.

Before planting the injured parts of the roots should be cut off with a sharp knife.

"Shortening in the branches is another very important matter to the life and vigor of the tree, and should be done at the time of planting. It consists in cutting back the ends of the branches, but to what extent it should be done depends upon circumstances. If the tree has lost the greater portion of its roots a severe "shortening in" of the head will be necessary; if only a small portion of the roots are cut off, moderate pruning will be sufficient. In all cases it should be done in a manner corresponding to the loss of roots.

Cultivate the orchard a few years with hoed crops, and apply manure and phosphates to the surface.

Small fruits such as raspberries and strawberries should not be allowed to fruit the first year.

APPLES.

PRICES:—20 cts. each; $1.50 per 10; $12 per 100, except otherwise noted. Have a large stock of these, vigorous, smooth and well rooted. Special rates when wanted per 1,000 or larger quantities.
SUMMER VARIETIES.

Yellow Transparent
Early Harvest
Red Astrachan
Early Ripe
Early Strawberry
Fourth of July
Large Sweet Bough
Early Joe
Summer Pearmain
Summer Queen.

FALL VARIETIES.

Maiden's Blush
Fallawater
Duchess of Oldenburg
Haas.

WINTER VARIETIES.

Grimes Golden
Rome Beauty
Smokehouse

Yellow Transparent — Fruit above medium size; yellow; valuable as an early variety for market, ripening a week or ten days in advance of the Early Harvest.

Early Harvest — Medium size, pale yellow; sub acid flavor; productive.

Red Astrachan — Rather large; deep crimson; acid flavor; profitable for market.

Early Ripe — Pale yellow with gray dots; size medium; sub acid; good market sort.

Early Strawberry — Medium size; yellowish white, striped with red; productive.

Fourth of July — Medium size; oblate; red striped; sub acid; early.

Large Sweet Bough — Light yellow; large size; sweet, rich; good for market and table use.

Early Joe — Small size; color red; good bearer.

Summer Pearmain — Medium size; greenish with deep red in the sun; flesh yellowish; crisp and aromatic.

Summer Queen — Large size; color deep yellow, striped with red, flesh rich; aromatic flavor.

Maiden's Blush — Medium size; waxen yellow with carmine cheek, beautiful, fine grained, juicy, excellent.

Fallawater — Very large; yellowish; productive; valuable for market.

Duchess of Oldenburg — Size medium, striped with red, and of excellent quality; introduced from Russia.

Haas — Medium to large; pale greenish yellow shaded into light and dark red, good, sub-acid, valuable for market.

Grimes' Golden — Size medium, rich golden yellow; productive, an excellent keeper.

Ben Davis — Large; striped with red; sub acid, good; very popular West and South.
Rome Beauty—Large, striped with red; fine flavor and quality.
Smokehouse—Size medium to large; yellow, shaded with bright red, and brown dots; productive and of good quality.
Wealthy—Size medium, color bright red, quality excellent, tree productive and hardy.
Baldwin—Large, dark red, productive, good quality and profitable.
Pewaukee—Fruit good size, clear yellow sprinkled with dark red, good bearer, and of best quality.
McIntosh Red—Medium to large, pale yellow shaded with crimson, good quality, regular bearer.
Rhode Island Greening—Large, yellowish green, tender, rich.
Walbridge—Medium size, yellow marbled with red, good.
Limber Twig—Of North Carolina origin, size above medium, color greenish yellow, shaded with dull crimson and light dots, flesh sub-acid with brisk flavor; good keeping qualities.
Winesap—Medium, oblong, dark red, flesh yellow, firm and crisp, productive and desirable keeper.
Lankford Seedling—Large size; red; productive and long keeper; of excellent quality; originated in Kent Co., Md.
Lauver—Originated in Platte County, Mo., large; color dark red; sub-acid; tree vigorous grower and productive; valuable long-keeping sort.
Gibbs—Medium to large, color white shaded with brown, mild, sub-acid flavor; valuable long keeping properties.
York Imperial—Medium to large, white, shaded with dark crimson, flesh firm, juicy, sub-acid; very desirable.
Smith's Cider—Medium to large; greenish white and striped with red; early bearer and reliable.
Nick-a-Jack—Large, striped, good quality, productive and long keeper; originated in the South.
Kent Island Pine—Large, greenish yellow, with bright blush, flesh white, juicy, sub-acid, good.
Rawle's Janet—Medium, yellow striped with red, productive, good quality and good keeper.
Shockley—Medium to large, waxen yellow with blush, productive, good quality and good keeper.
Carthouse—Medium size, roundish oblong, richly streaked with deep red and yellow, productive and good keeper. Origin Virginia.
Nero—Large, roundish, deep red, sub-acid, productive and good keeper.
Nansemond Beauty—Medium size, yellow, sub-acid, good.
Delaware Red Winter—Large size, bright red color, handsome, firm, brisk sub-acid, vigorous growth and bears young.

Crab Apples.

PRICES:—30 cts. each; $2.50 per 10.
Yellow Siberian—Size small, pale yellow, valuable for preserving.
Red Siberian—Small size, bright red, with slight bloom; excellent for preserving.
Transcendent—Large, yellow, productive, good.
Hewes' Virginia—Small size, color red, streaked with yellow; very productive and most valuable for cider.
This fruit is grown as a specialty with us. Located in a section where the peach is most favored, free from all disease and with thrifty fruiting orchards on all sides, we are enabled to have vigorous young trees of the most approved varieties and every facility for having them true to name. They require a well drained soil. A warm, sandy or gravelly loam is well suited to preserve a healthy growth, and should be fertilized and kept in cultivation. Ashes, potash and bone are excellent fertilizers, though the tree will respond kindly to any fair dressing material. Cut to a naked cane and top when planting. The previous year’s wood of the peach should be shortened in to keep the head vigorous and in good shape.

The following list embraces a number of new sorts of promise as well as other varieties lost sight of for some years past, again brought forward for proper recognition. In this connection it is well to state that many of the so-called extra early peaches prove to be very similar in character and unreliable for profit. Of the many late large yellow sorts, the greater number are much like the Late Crawford, and evidently sports of that well-known variety under certain conditions of soil, locality and treatment.

PRICES:—First size, one year from the bud, 10 cents each; 75cts per 10; $6 per 100; $50 per 1000. Medium, one year from the bud, $5
per 100; $40 per 1000. Third size, one year from the bud, $4 per 100; $30 per 1000. June Budded—1st grade, $5 per 100; $40 per 1000. 2d grade, $4 per 100, $3 per 1000.

List of Varieties Alphabetically Arranged. Leading varieties in heavy type.

Albright's October—Origin, North Carolina; large, white clingstone sort, and as such desirable; late.

Alexander—Origin, Logan county, Illinois; medium, white flesh, skin highly colored red; ripening in advance of the Hale's Early.

Amelia—Large and roundish oblong, white flesh, fine blush, ripens nearly with the Mountain Rose, good.

Amsden June—Origin, Carthage, Mo. This is similar to the Alexander in character.

Beer's Melacoton—Large, yellow, freestone, ripening between the Crawford's Late and Smock.

Beer's Smock—Well-known and popular late variety, size medium to large, oval, deep yellow with red cheek, flesh yellow and rather dry; productive. Very popular for canning, evaporating, etc., tree more productive than usual with the yellow sorts.

Bilyeu's October—A very late peach, fully two weeks after the Smock; large size with slight red cheek, freestone.

Brandywine—Large, yellow, firm and desirable, freestone. similar to the Crawford's Late in appearance, and desirable as a succession

Brigg's Red May—Of California origin, profitable there as an early peach, but in this section classed with the Alexander and other early sorts.

Bronough—A late clingstone sort. size large, white flesh, late.

Bidwell's Early—From A. J. Bidwell, Orlando, Florida. Of the Chinese strain. Size medium, white flesh, highly colored. Tree of willowy growth, better suited for the extreme south where other varieties do not succeed.

Bonanza—Of Texas origin. Medium size white flesh with red cheek. productive very late.

Captain Ed.—New variety from Illinois, of growing popularity. Size large, yellow, freestone. Tree vigorous grower and productive.

Carroll's Late Yellow—Yellow flesh, large, freestone, ripening later than the Smock; originated in Maryland.

Chair's Choice—Of Maryland origin, large, yellow, freestone, ripening in season of Smock.

Chinese Cling—A favorite at the South, large size, creamy white, with fine blush, ripens middle season

Christiana—Yellow, freestone, large, ripens a few days prior to the Late Crawford.

Columbia—Yellow, freestone, large, ripening in middle of season, about with the Susquehanna.

Conkling—Originated in New York State, medium to large, yellow, freestone. ripens near the Early Crawford.

Crawford's Early—Large, yellow with red cheek, freestone, an old well-known variety.

Crawford's Late—A very desirable yellow-fleshed variety; tree a strong grower, fruit large, showy, profitable. freestone.

Early Rivers—Good size, pale straw color, good quality, tender.
Early Louise—Small, white flesh, high color, ripens in advance of Hale's Early.

Elberta—Large, yellow, freestone, with red cheek, very productive, season of ripening between Reeve's Favorite and Crawford's Late, very valuable.

Early York—An old well known sort of good quality, and yet planted to some extent, but being superseded by more popular sorts such as Mountain Rose, and Family Favorite, ripening about same season. Rather large, flesh white, fine grained, excellent flavor, clings slightly.

Family Favorite—Seedling of the Chinese Cling, large handsome freestone, prolific, excellent for shipping, canning or drying, ripens slightly in advance of Early Crawford.

Ford's Late—Medium to large, white flesh, freestone of excellent quality. Ripens in advance of Smock, tree vigorous grower and great bearer.

Foster—Yellow, large size when not heavily laden, freestone.

Fox's Seedling—Large, white with crimson cheek, freestone; reliable and uniform bearer.

Geary's Hold-On—Medium to large, yellow, freestone, similar to the Smock, through some days later in ripening.

Globe—Origin, Pennsylvania; of the largest size, yellow, freestone, late, productive and profitable.

Hale's Early—Claimant for extra early honors, and no doubt the parent of many new claimants for that position; medium size, red with high color when exposed, good bearer, but not reliable for profit.

Henrietta—Handsome late yellow cling, of large size, productive and excellent, long keeping qualities.

Hill's Chili—Origin Monroe county, N. Y., fruit small, yellow, downy, very productive but inferior. Valuable in Michigan and Western New York, but not on the Delaware Peninsula.

Honey—Medium size, white flesh with red blush, shape of an almond, delicate sweetness.

Japan Blood—Received from J. L. Normand, Marksville, La. Ripens with the Alexander and of about same size, flesh firm, color red, seed small. Tree of dwarf habit, but strong and vigorous, bearing fruit when quite young, believed to be the best for growing under glass at the North. Special price.

Lady Ingold—Origin, Guilford county, N. C., resembles the Yellow St. John in time of ripening and general appearance.

Late Heath Cling—Large, oval with a sharp apex. Skin white, sometimes with red cheek, flesh firm, white, sweet, and somewhat aromatic, excellent for preserving, ripens in September.

Lemon Cling—Large, lemon-shaped, firm, rich and vinous.

Magnum Bonum—Large, yellow freestone, ripens near the late Crawford.

Marydel—Of Maryland origin, large, yellow, freestone, of the Crawford's Late class, ripens about that season.

Mary's Choice—Large, yellow with red cheek, fine quality, freestone; rather shy, but not so much as Susquehanna.

McCullister—Late, yellow, freestone, large size and productive, ripening in season of Smock but more showy than that variety.

Moore's Favorite—Very similar to the foregoing, but few days later, fruit larger size and not quite so heavily laden; very desirable.
Muir—Originated with G. M. Thissel, of Clinton, Cal. Size large to very large, flesh yellow, firm and of the best, freestone. Excellent for canning, shipping or drying. Valuable.

Mountain Rose—One of the best, large, white flesh with red cheek, productive, free.

Musser—Originated with Engle, of Pennsylvania, classed with the early as previously mentioned.

Old Mixon Cling—A large handsome clingstone, white flesh, red cheek, rich and highly flavored, productive, middle of the season.

Old Mixon Free—Large white flesh with red cheek, freestone, productive and profitable.

Peen To—Flat peach of Chinese origin, similar in quality to the Honey peach, ripens with the Yellow St. John.

Picquet's Late—Georgia origin, large, yellow, freestone, productive, ripens with the Smock.

Princess Late Hareripe—Large, roundish oval, grayish, thickly marbled with redish spots, flesh white, high flavor, freestone.

Pallas—A seedling of the Honey peach, partaking of the habits of that variety in growth and fruit, but claimed to be much superior in general characteristics.

Peruvian—Very ornamental in bloom, being profusely covered with double blossoms of beautiful and showy appearance, but no value for fruit.

Prize—Large, yellow, freestone; profitable late sort and very popular where known.

Pullen's Seedling—Large, yellow with red cheek, freestone; much like the Crawford's Late, but considered a more uniform bearer.

Reeve's Favorite—Large, roundish, yellow, handsome, freestone; rather a shy bearer; the fruit commands high figures in the markets.

Red Cheeked Melacoton—Large, roundish oval with swollen point, yellow with red cheek, flesh deep yellow, red at the seed, freestone, ripens slightly in advance of the Crawford's Late.

Richmond—Medium size, yellow with dark red blush, freestone, ripening near the Crawford's Early, do not consider it very desirable.

Salway—Medium to large, yellow, freestone only when fully ripe, does fairly well on light land, much later than the Smock.

Shipley's Late Red—Medium to large, white flesh with red cheek, productive, freestone, desirable.

Silver Medal—Medium to large, white flesh with slight blush, freestone, ripens a few days later than the Smock.

Smock Cling—Medium to large, yellow, productive, good, chiefly valuable for canning and preserving.

Steadley—Medium to large, greenish white color, flesh white to the stone, ripens after the Smock.

Stevens' Rare-ripe—Large, white flesh with red cheek, fine flavor and quality, freestone.

Stump the World—Large, creamy white with red cheek, high flavor, productive, freestone.

Susquehanna—Very large, yellow, freestone, middle season, shy bearer.

Troth's Early—Medium size, red cheek, freestone, hardy and productive.

Townsend—A large and showy yellow peach of local favor in Del-
Of the Crawford Late class, which it much resembles but it is claimed to be an excellent bearer, of very large size, reliable in fruiting, and slightly later than the Crawford.

**Walker's Variegated Free**—Medium to large, white flesh with red cheek, handsome, heavy bearer of uniform fruit; one of the best.

**Wager**—Yellow, freestone, productive and hardy. Ripens slightly after the Early Crawford; heavy bearer.

**Ward's Late**—Medium size, roundish, skin white with blush, flesh white, quality good, freestone; ripens a few days later than the Late Crawford; heavy bearer.

**Waterloo**—Origin New York State; one of the extra earlies; fruiting tests place this in the same class with other claimants.

**Wheatland**—Large, golden yellow with carmine cheek, flesh yellow, freestone; ripens with the Late Crawford; valuable.

**Wilkin's Cling**—Origin, Maryland, from the late Colonel Wilkin's; larger than the Late Heath, while possessing the qualities of that well-known variety; fine for canning and preserving.

**Wonderful**—A new, very late peach of large size, yellow, freestone. Productive and of remarkably long keeping qualities; season of ripening one week to ten days after the Smock.

**Yellow St. John**—Medium to large, yellow with handsome blush, freestone, early and productive; profitable market variety.

Errata—In description of Moore's Favorite on page 7 for "foregoing" read Old Mixon Free.

## NECTARINES.

The Nectarine is a most delicious fruit with smooth skin. It requires the same culture as the peach.

**Prices**: 30 cents each; $2.50 per 10. **June Budded**, 20 cents each; $1.50 per 10.

**Early Violet**—Large, pale yellowish green, dark purplish red when exposed; flesh white with red at stone, rich and highly flavored.

**Early Newington**—Large, pale green ground nearly covered with bright red marbled with dark red, flesh white, red at stone, juicy, rich.

**Early York**—Large, pale green ground, bright red when exposed, red at the seed, rich.

**Boston**—Large, bright yellow with deep red cheek, flesh yellow, sweet and pleasant flavor, separates from the stone.

**Elrige**—Medium size, pale green ground with deep red when exposed to the sun, flesh yellow, dry and sweet.

**Hunt's Tawny**—Medium size, pale orange with dark red cheek mottled with russety specks, flesh deep orange, juicy and rich.

**Golden**—Medium size, bright waxen yellow color with scarlet cheek flesh yellow, firm, sweet.

**New White**—Large, color white with slight tinge of red in the sun, flesh white, tender, rich, vinous flavor.
PEARS.

PRICES:—Standard, 2 and 3 years, 40 cts. each, $3.00 per 10, $25.00 per 100. Standard, 1 year, 25 cts. each, $2.00 per 10, $15.00 per 100. Dwarf, 2 and 3 years, 30 cts. each, $2.50 per 10, $20.00 per 100. Dwarf, 1 year, 20 cts. each, $1.50 per 10, $12.00 per 100.

Pears require better culture than the apple. The fruit is of much better quality to be gathered while yet hard. Becomes more juicy and will keep longer.

_Burere Gifford_—Medium to large, greenish yellow, marbled with red on the sunny side, flesh white, juicy, with an excellent vinous flavor; an early pear of value.

_Lawson or Comet_—LARGE EARLY PEAR, BRIGHT YELLOW GROUND AND RED WHEN EXPOSED TO THE SUN; TREE VIGOROUS AND PRODUCTIVE.

_Clapp's Favorite_—Large, delicious, good grower, productive, ripens in advance of Bartlett and rots at the core unless picked early.

_Bartlett_—Large, clear yellow, juicy, excellent, young and regular bearer, reliable and profitable.
Le Conte—Large, greenish yellow, bell shaped. Flesh of good quality and ripens early in the season; tree a handsome grower.

Flemish Beauty—Large, pale yellow, mostly covered with patches of light russet, becoming reddish brown on sunny side at maturity, juicy and rich with musky flavor. Autumn.

Seckel—Small, yellowish russet, red cheek, juicy and rich.

Sheldon—Medium size, roundish, obtuse obvate, color greenish yellow, covered with light russet of brownish crimson, late fall, good quality.

Beurre Bosc—Large, skin smooth, dark yellow with cinnamon russet red on one side, regular bearer and of the highest flavor.

Souvenir du Congress—Large to very large, resembling the Bartlett in form; yellow with bright red on the exposed side, high flavor, similar to the Bartlett; continues in bearing August until in September.

Idaho—(New) Very large, yellow, best quality; season of ripening late autumn.

Beurre d'Anjou—Large, yellowish with russetted red cheek, fine grained; excellent late pear.

Keiffer—Large, bright yellow and red, very juicy, acid, good canning sort, coming late in season; strong grower and productive.

Lawrence—Medium, light yellow, rich and aromatic, very reliable and productive. Autumn.

PLUMS.

The plum tree, in well prepared soil, is free from disease, except occasionally the black knot, and this is easily remedied by severe cutting away in the early stages. The fruit is usually troubled with the curculio, a small dark brown beetle, causing it to drop off. This can be prevented
by proper care. After the blossoms fall spread two sheets under a tree and give it a sudden jar by striking a sharp blow upon the stem of a limb sawed off for the purpose. The insects will drop upon the sheets and can be killed. Collect the fallen fruit and burn or feed to the swine from day to day. It should be done before sunrise. Trees planted in hen yards give full crops, as the curculio is eaten and the trees fertilized.

PRICES:—On plum stock, 35 cts. each, $3 per 10, $25 per 100. On peach stock, 20 cents each, $1.50 per 10, $12 per 100. JUNE BUD-DED: 20 cts. each, $1.50 per 10, $12 per 100.

Abundance—Large, bright red, good quality, small seed, freestone. Tree rapid grower and heavy bearer; profitable.

Bassett—Medium, copper-colored, good quality, very productive.

Bingham—Large, oval, deep yellow with red on the sunny side juicy, rich, high flavor.

Burbank—Large size, globular shape; usually 5 to 5½ inches in circumference, cherry red, with lilac bloom, flesh deep yellow, very sweet. Tree vigorous grower and productive, bearing when young.

Botan—Similar to the Abundance, and description of that variety will serve for the Botan.

Bradshaw—Very large, dark violet red; vigorous and productive; early.

Chabot—Very large, greenish purple, firm, vigorous grower and abundant bearer.

Coe’s Golden Drop—Large, oval, yellow dotted with red, juicy, rich.

Caddo Chief—Medium, bright red, flesh firm and of cherry appearance, early.

De Caradenc—Medium, color cherry, flesh firm and good.

Gen. Hand—Large, golden, yellow, sweet.

German Prune—Large, oval, purple, agreeable flavor.

Golden Beauty—Size medium, bright yellow or golden color, flesh firm, quality good, an early and regular bearer.

Hattie Porter—Chickasaw class, small size, thin skin, sub-acid flavor.

Harper—Of the same class as the foregoing and much similar in habits; branches thorny; head rather bushy; fruit ripens quite early.

Imperial Gage—Large, oval, pale green, juicy and sweet.

Kelsey’s Japan—Large sized, heart shaped, yellow with bright red, firm, good.

Lombard—Medium, oval, violet red, flesh yellow; vigorous and good bearer.

Marianna—Seedling of the Wild Goose, medium size, red, good quality; season of ripening late.

Moore’s Arctic—Medium to large, purplish black, with blue bloom; flesh greenish yellow, juicy, sweet and pleasant; very hardy, vigorous, and enormous bearer.

Miner—Medium to large, roundish, dark purple, strong grower and abundant bearer.

Ogon—Large and roundish, golden yellow with slight bloom, firm, vigorous and productive.

Richland—Medium, purplish green, sweet, excellent for cooking, not readily damaged by the curculio.

Shropshire Damson—Medium size, color purple with heavy blue bloom, juicy, acid, fine for preserving, productive.
Prunus—Size large, color yellowish green, small seed, freestone, fine for canning.

Simoni—Apricot plum from China. Good size, red, highly flavored.

Shipper's Pride—Large, round, purple, firm, excellent quality; strong grower and very productive.

Satsuma—Large, purplish crimson, firm, seed very small; quality excellent; tree very vigorous and productive.

Wild Goose—Of the Chickasaw class and not easily injured by the ravages of the curculio; large, bright red with grayish bloom, juicy and sweet, productive.

Yosemite—Medium, yellow with handsome bloom, flesh firm, late, good for preserving.

Yellow Japan—Large yellow with cherry red cheek, globular in shape; vigorous grower and productive, ripens early.

Prunis Pissardi—An ornamental plum for the lawn. Foliage deep purplish blood color, and it retains its color better than other purple leaved trees.

PRUNES.

Prune D'Agen (Robe de Sargent)—Recently introduced from France; medium size, oval, skin purple, nearly black, with thick blue bloom; flesh greenish yellow. Sweet sugary and delicious, slightly adhering to the stone; valuable for drying and preserving.

Petite D'Agen (Burgundy Prune)—Medium size, egg-shaped, violet purple, juicy sweet and rich; valuable for drying, tree a prolific bearer.

Silver Prune—Originated in Oregon. Said to be a seedling of Coe’s Golden Drop, and resembles the same. Ranked as one of the best for drying purposes because of its large size, handsome appearance and superior flavor.

Tragedy Prune—A new prune originated by Mr. Runyon, in Sacramento County, Cal., size medium, skin dark purple, flesh yellowish green, very rich and sweet, frees readily from the seed. Early and valuable.

Hungarian Prune (Dalte De Hungrie)—Of recent introduction, large and very long fruit, skin dark purple, covered with whitish bloom; flesh greenish yellow, firm and rich; parts freely from the stone good for drying.

Golden Prune—Seedling from the Italian, though somewhat larger, light golden color, exquisite flavor, and dries most beautifully; averaging 24 to the pound. Easily peeled and separates readily from the stone, which is quite small for size of the fruit. The tree a strong grower and abundant bearer.

QUINCES.

Champion—Large, yellow, showy and handsome; ripens two weeks later than the Orange. Price, 30 cts. each; $25.00 per 100.

Orange or Apple—Large, rich golden yellow, and of very best quality. Price, 25 cts. each; $20.00 per 100.

Meeche’s Prolific—Large, bright yellow, vigorous and wonderfully productive. Price, 35 cts. each; $25.00 per 100.
Cherry trees do well on most all soils, when well drained, and are profitable as well as ornamental. Should be planted more extensively.

PRICES:—35 cts. each; $3.00 per 10 and $25.00 per 100.

- *Early Richmond*—Medium, dark red, juicy, sprightly acid; best for cooking and canning.
- *Early Black*—Large, heart-shaped, color jet black, flesh dark purple, firm and sweet.
- *Black Tartarian*—Large, purplish black, rich and juicy.
- *Gov. Wood*—Large, yellow with red cheek, juicy and sweet.
- *Yellow Spanish*—Large, light yellow with red cheek, firm and sweet; one of the best.
- *Ohio Beauty*—Large, white with blush, flesh white, tender, rich.

Mid-season.

- *Montmorency*—Large, bright red, acid, larger and later than Early Richmond.
- *Black Eagle*—Large, tender, rich, reliable, late.
- *English Morello*—Large dark red, productive and profitable. Late.
Great Bigarreau—Very large, dark red or quite black at maturity, firm and fair flavor.

Bigarreau—Large, waxen appearance, heart-shaped, flesh pale yellow, firm and sweet.

APRICOTS.

(REDUCTED SIZE.)

Similar to the peach, with smooth stone; valuable for earliness. It requires about the same treatment as plums and nectarines; bears good crops under favorable circumstances.

PRICES:—30 cents each; $2.50 for 10. JUNE BUDDED: $2.00 per dozen; $12.00 per 100.

* Early Golden*—Small, roundish, color pale orange, flesh yellow, juicy and sweet, separates from the stone.

* Golden Drop*—Good size, bright orange and crimson, delicious flavor.

* Breda*—Large, deep golden yellow with red cheek when exposed to the sun, firm, rich flavor.

* Royal*—Large, yellow and orange; juicy, rich and delicious. One of the best.

* Early Large*—Of good size, pale orange color, good quality, separates freely from the stone.

* Peach*—Of the largest size, rather flattened, skin yellow in the shade, but deep orange mottled with dark brown on the sunny side; highly flavored, juicy and rich.

* Moorpark*—Large, roundish, color orange with brownish red in the sun, flesh firm with high flavor.
Russian Varieties.

Alexander—An immense bearer; fruit large, yellow, flecked with red, both skin and flesh sweet and delicious; one of the best.

Nicholas—Good bearer, fruit medium to large, white, sweet, melting, valuable.

Alexis—An abundant bearer; fruit yellow with red cheek, large, slightly acid, rich and luscious.

Catharine—Vigorous and productive; fruit medium size, yellow, sub-acid good.

Gibb—A good bearer; fruit medium size, yellow, sub-acid, rich, juicy; the best early variety.

J. L. Budd—Size large, white with red cheek, sweet, fine flavor. Strong grower and abundant bearer, late.

GOOSEBERRIES.

Houghton Seedling—Vigorous American sort, productive and free from mildew, fruit medium, smooth, pale red, good. Price. $1.00 per dozen, $5.00 per 100, $35 per 1000.

Downing’s Seedling—Fruit large, smooth, light green, vigorous and productive. Price, $1.25 per dozen, $8 per 100, $65 per 1000.

Smith’s Seedling—Large, oval, light green, firm and good. Price, $1.50 per dozen, $10 per hundred, $75 per 1000.
CURRANTS.

Cherry—Large, deep red, bunch long, excellent quality, vigorous and productive. Price $1.50 per dozen, $5 per 100.
